

# SAI -- A Three-stage Curriculum for Dual-robot Collaboration

(a) Solo Bootstrapping

Human Partner

Robot A

Teleoperating  $A$  with a human partner to learn local competence

(b) Asymmetric Co-teaching

Robot B

Robot A

Deploy  $\pi_A^{(1)}$ : teleoperating  $B$  to adapt to partner's learned dynamics

(c) Closed-loop Intervention

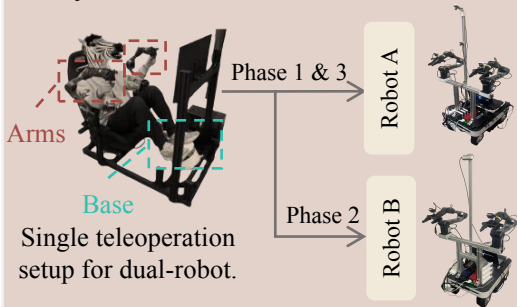

Robot B

Robot A

Deploy both  $\pi_A$  and  $\pi_B$ : intervening on  $A$  to refine reciprocal coupling

## Teleoperation System

## Policy Instantiation
